SECTION 4: First-aid Measures

- General advice: In the case of accident or if you feel unwell, seek medical advice immediately. When symptoms persist or in all cases of doubt seek medical advice
- Inhalation: If inhaled, remove to fresh air. Get medical attention if symptoms occur.
- Skin: Wash with water and soap as a precaution. Get medical attention if symptoms occur.
- Eye: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lens, if worn. Get medical attention.
- Ingestion / Intoxication: If swallowed, DO NOT induce vomiting. Get medical attention if symptoms occur. Rinse mouth thoroughly with water
- Most important symptoms and effects, both acute and delayed: Causes serious eye irritation
- Protection of first-aiders: No special precautions are necessary for first aid responders.

SECTION 5: Fire-fighting Measures

- Flash Point – 21°C
- Explosive Limits – None Known.
- Extinguishing Media – Water spray, Alcohol-resistant foam, Dry chemical, Carbon dioxide (CO₂)
- Unsuitable extinguishing media: High volume water jet

SAFETY DATA SHEET

ONE STEP HAND SANITIZER

- Fire Fighting Instruction – Do not use a solid water stream as it may scatter and spread fire. Flash back possible over considerable distance. Vapors may form explosive mixtures with air. Exposure to combustion products may be a hazard to health.
- Hazardous combustion products: Carbon oxides
- Specific extinguishing methods: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Use water spray to cool unopened containers. Remove undamaged containers from fire area if it is safe to do so. Evacuate area.
- Special protective equipment for fire-fighters: In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment.

SECTION 6: Accidental Release Measures:

- Personal precautions, protective equipment and emergency procedures: Remove all sources of ignition. Use personal protective equipment. Follow safe handling advice and personal protective equipment recommendations..
- Environmental Precautions: Discharge into the environment must be avoided.
- Spill / Leak Clean-up – Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.
- Methods and materials for containment and cleaning up: Non-sparking tools should be used. Soak up with inert absorbent material. Suppress (knock down) gases/vapors/mists with a water spray jet. For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

SECTION 7: Handling and Storage

- Advice on safe handling: Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from fire, sparks and heated surfaces.
- Conditions for safe storage: Keep away from heat and sources of ignition. Keep in a cool, well-ventilated place. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labeled containers.
- Storage temperature: 15 °C to 30 °C
